## **Differences Sudoku**

Place a digit from 1 to 9 into each of the empty squares so that each digit appears exactly once in each of the rows, columns and the nine outlined 3x3 regions.

A number between two cells indicates the difference of the numbers in these cells. A number between four cells indicates the difference between two diagonally adjacent cells, either top left + right bottom (\) or top right + bottom left (/). If one of the characters is specified the apex of the angle points to the smaller of these numbers.

$\begin{array}{c c c c c c c c c c c c c c c c c c c $									
4       1       5       2       6       9       8       3       7         3       7       6       8       5       4       1       2       9         4       9       1       4       2       2       8       3       2       5         7       9       1       4       2       2       8       3       2       5         5       6       4       1       7       3       9       8       2         8       3       2       6       3       9       5       4       7       1         9       4       7       5       3       6       9       8       2         8       3       2       6       3       9       5       4       7       1         9       4       7       5       3       6       2       1       8         1       5       3       9       8       2       7       6       4         6       2       8       7       3       4       1       5       9       6       3         6       2 </td <td></td> <td>8</td> <td>9</td> <td>3</td> <td>1</td> <td>7 1</td> <td>&gt; 6</td> <td>4</td> <td>5</td>		8	9	3	1	7 1	> 6	4	5
