## **Differences Sudoku**

Place a digit from 1 to 9 into each of the empty squares so that each digit appears exactly once in each of the rows, columns and the nine outlined 3x3 regions.

A number between two cells indicates the difference of the numbers in these cells. A number between four cells indicates the difference between two diagonally adjacent cells, either top left + right bottom (\) or top right + bottom left (/). If one of the characters is specified the apex of the angle points to the smaller of these numbers.

9       7       2       7       1       5       3       4       6       8         1       4       2       6       2       7       8       3       9       5         5       2       3       8       9       4       6       2       7       6       1         6       9       2       8       1       6       7       5       4       3         6       9       2       8       1       6       7       5       4       3         3       1       4       5       6       4       2       9       8       7         7       8       5       3       9       4       6       1       2         2       7       2       9       3       6       3       1       8       5       1>         4       6       3       7       8       5       1       2       9				_
