

Makodoku

Place a digit from 1 to 9 into each of the empty squares so that each digit appears exactly once in each of the rows, columns and the nine outlined 3x3 regions.

A cross between two cells indicates that the product of the numbers in these cells is less than 10. A plus between two cells indicates that the sum of the numbers in these cells is less than 10. If the sum and product are less than 10, then there is a cross between these cells. If there is no sign between two cells, then both sum and product are at least 10.

(Solution)

The puzzle grid is a 9x9 grid with 3x3 regions outlined in thick black lines. The grid contains various signs (+ and x) between cells and some pre-filled numbers (8, 5, 3, 9). The signs indicate constraints on the sum and product of adjacent cells. The numbers are placed in specific cells: 8 in row 2, column 6; 5 in row 3, column 6; 3 in row 8, column 4; and 9 in row 9, column 4.
