

## 四重數獨

將1到9的數字放入每個空方塊中，以便每個數字在每行、每列和9個3x3區域中恰好都出現一次。

行列相交處的四位數字表示這四個數字必須放置在四個相鄰單元格中。

(答案)

|      |   |  |      |  |   |      |   |      |
|------|---|--|------|--|---|------|---|------|
|      |   |  |      |  |   | 5    |   | 7    |
|      |   |  |      |  |   |      |   |      |
|      |   |  | 1356 |  |   | 1899 |   |      |
|      |   |  |      |  |   |      |   | 2    |
| 3445 |   |  |      |  |   |      |   | 2357 |
|      |   |  |      |  | 3 |      | 9 |      |
|      |   |  |      |  |   |      |   |      |
|      |   |  |      |  |   |      |   |      |
| 2568 |   |  |      |  |   |      |   | 1469 |
| 5    |   |  |      |  |   |      |   |      |
|      |   |  | 2344 |  |   | 2677 |   |      |
|      |   |  |      |  |   |      |   |      |
|      | 9 |  | 6    |  | 1 |      |   |      |
